BlueYonder

Luminate Control Tower

25-60%
Planning Efficiency Improvements

The award-winning Blue Yonder Luminate™ Control Tower provides:

• End-to-end supply chain visibility

• Prescriptive recommendations powered by AI and machine learning to drive results

• Demand and supply adjustments on the fly based on real-time data

• More strategic and profitable decisions

Seamless Customer Experiences

Real-time supply chain visibility into on-hand and projected inventory levels and inbound/outbound shipments.

30% > **Optimized** > **0.5–1.5%**

Reduced expediting expenses | Product mix | Revenue growth

End-to-end supply Chain connectivity

Supplier → Factory → Distributor → Retailer → Customer

10-20%
Reduced inventory write-off

The ability to see, plan and act on real-time information from suppliers, factories, distributors, retailers and customers.

Increased
Service Levels

Intelligent and Profitable Decision Making

Analyze data at scale with machine learning to generate prescriptive recommendations, minimize risk and capitalize on opportunities.

10-30%
Reduction on expedited logistics expenses

10%
Lower inventory investment without impacting service levels

5-10%
Inventory reduction with improved inventory visibility and reliability

Optimized product mix to improve gross margin rate by 10–50 basis points

Green is the new black

Leverage AI algorithms to improve merchandising and supply chain processes to boost sustainability and eliminate waste.

20% less waste

30% reduction in shelf gap

80% reduction in out-of-stocks
