

Start the journey to the cloud to future-proof warehouse management

The COVID-19 pandemic introduced considerable challenges to the warehouse, an already fast-paced and critical point in a business's operations. From managing workers and tracking inbound and outbound packages to orchestrating robotic activities and improving sustainability, the modern warehouse requires a new level of insights, integrations, and management—more seamlessly executed in the cloud.

41%

of industrial manufacturing COOs want to prioritize cost control and supply chain transparency in the next 1-2 years¹

42%

of industrial manufacturing COOs want to prioritize real-time demand forecasting in the next 1-2 years²

63%

of business leaders want to increase the efficiency of their logistics operations to create additional value³

47%

of industrial manufacturing COOs want to prioritize Industrial Internet of Things solutions⁴

Transform your warehouse with a move to the cloud with Blue Yonder and Microsoft Azure

Enhance your Warehouse Management core capabilities

Streamline yard management

Seamlessly orchestrate check in, appointments, dock management, and more.

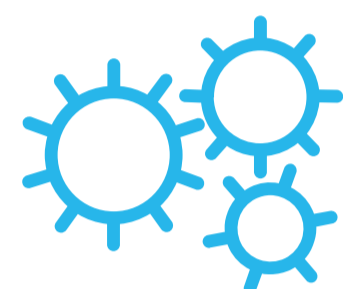

Enhance inbound and outbound processing

Optimize and gain visibility from receiving to shipping.

Manage inventory

Orchestrate quality, date/lot control, assets, serial numbers, and cycle counting from supplier's production to end user.

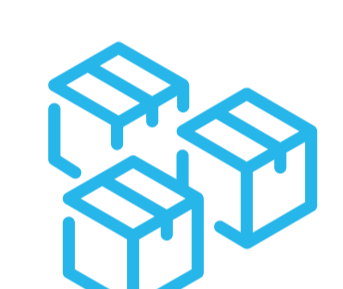

Administer value-added services

Seamlessly control kitting, assembly, disassembly, and other activities.

Optimize labor management

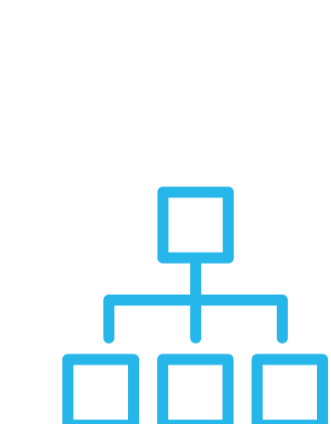

Engage and incentivize warehouse workers through coaching and standards.

Simplify parcel operations

Directly link to carrier processes and external services to enable track and trace capabilities.

Gain access to additional cloud-based solutions

Intelligently manage warehouse tasks

Assign tasks based on defined parameters while the solution tracks labor resources in near real-time. Gain a holistic view of resource schedules and tasks and use analytics tools to understand how to maximize efficiency.

Centralize robotics management

Quickly and efficiently onboard new robotics through a centralized hub. Gain real-time visibility into robotics operations, metrics, KPIs, and more through a unified view.

Leverage Data as a Service

Aggregate data into a centralized cloud environment for ease of reporting and analysis. Improve reporting through a common data schema across Blue Yonder solutions.

Seamlessly and securely access Blue Yonder solutions

Take advantage of a unified, cloud-based portal interface across Blue Yonder solutions. Strengthen security and lower risk through security features.

Future-ready logistics needs a future-ready cloud platform: Microsoft Azure

With Azure, Blue Yonder leverages an industry-leading foundation built on security, AI, ML, IoT, and data-driven cloud services, enabling powerful future-ready capabilities and sustainability across logistics and supply chains.

With Blue Yonder applications running on Azure, your business gains benefits only available on Azure to help you:

- Innovate faster through data insights and analytics
- Seamlessly scale globally or locally as needed
- Reduce TCO by eliminating on-premises technology investments
- Bolster data security through SSO, Azure Active Directory, and more
- Ensure applications are always up to date
