

Supply Chain Modernization with Blue Yonder SaaS

BlueYonder

TODAY

By the End of 2020¹

Enterprise infrastructure will be cloud-based

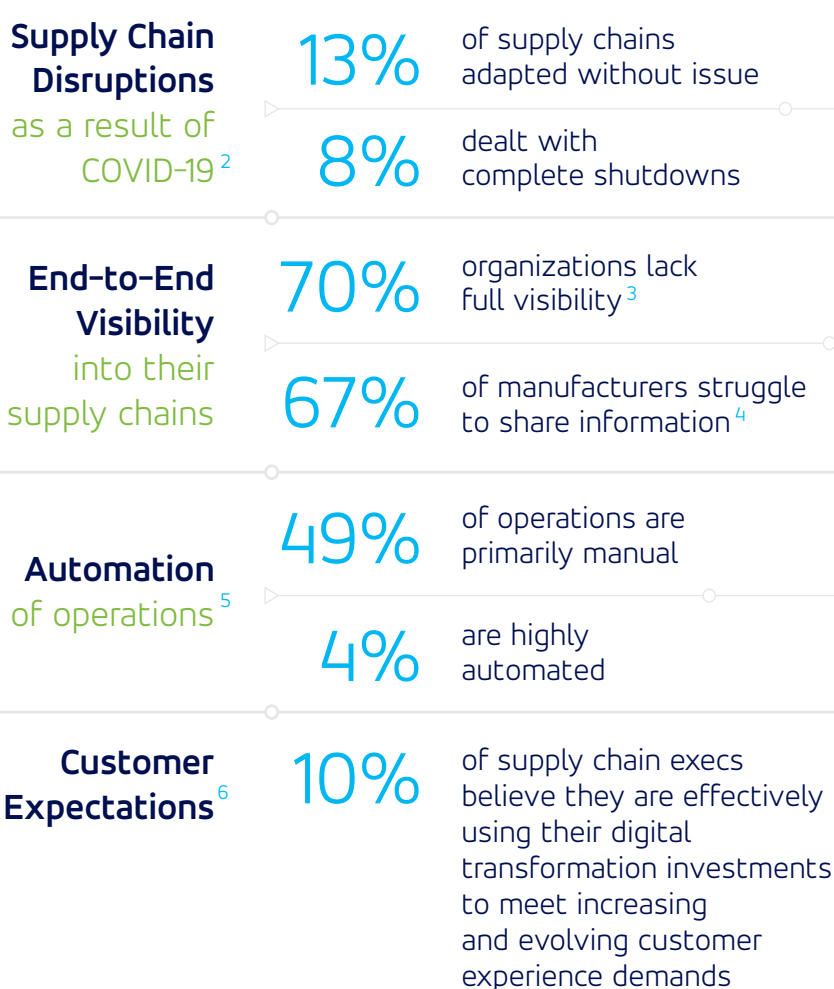

Workload will reside in the cloud

67zB+

Zettabytes of data will be flowing through cloud servers and networks

Key Drivers

6 Ways SaaS Makes the Digital Enterprise A Reality

Scalability

Dynamically scale up and down based on your needs with an easy consumption-based model for your enterprise.

Reduced Costs

Focus on your core business and delivering customer value, not on managing software and hardware.

Security

Re-engineer, automate, and harden security by leveraging resources from cloud providers and strategic partners.

Compliance

Automate compliance checking and remediation to further increase efficiency and productivity and maintain audit readiness.

Faster Time to Value

Enable faster upgrades and access to innovations for end users.

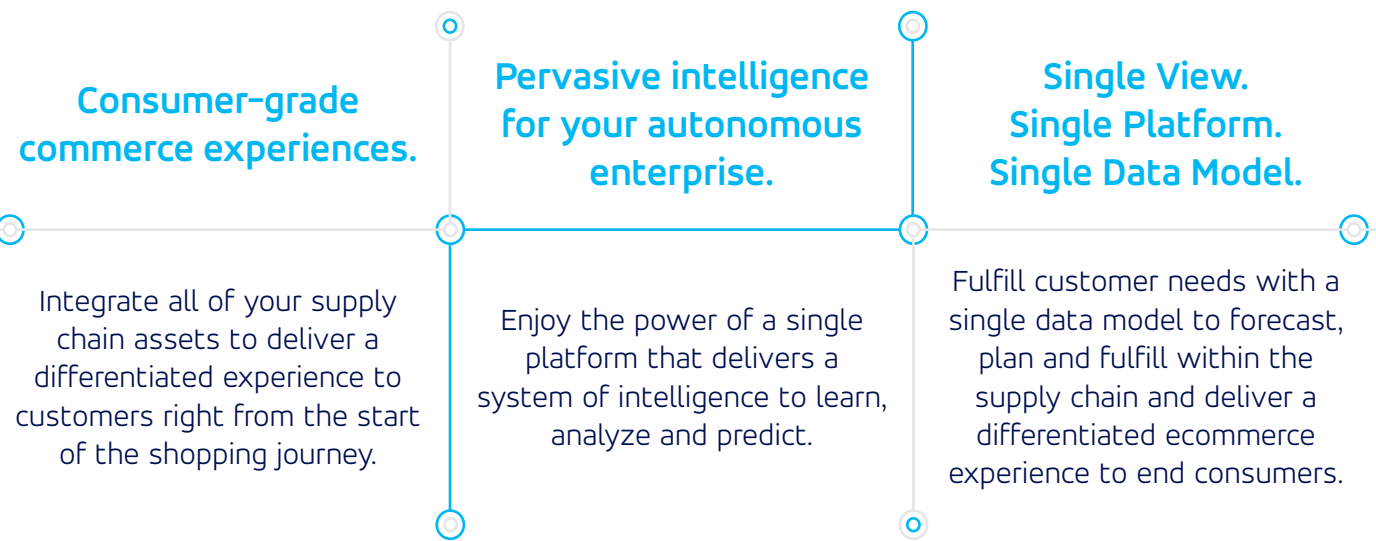

Flexibility

Empower access to business services while users are on the go, no matter the location, while monitoring operations effectively.

TOMORROW

Tomorrow's supply chains must be connected, enabled by a core cloud-based central platform that will integrate, orchestrate and execute actions across each node of the value chain.

Why Blue Yonder?

Expertise & Infrastructure

Deep expertise across all industries, underpinned by a joint enablement program and investments to deliver our offerings at the scale our clients need.

Innovation

We jointly develop innovative solutions that leverage Blue Yonder's Luminate platform and the full strength of its AI/ML capabilities.

End-to-end Transformation

Proven methodologies and a focus on end-to-end transformation opportunities that drive lower operational costs and improve process efficiencies.

Only e2e Digital Supply Chain Vendor in the market: SaaS or Hybrid

Only company named a leader in all Gartner Supply Chain Magic Quadrants

95% customer retention rate

Serves 73 of the top 100 retailers⁷

450+ granted and pending patents
